**RE: COVID-19 DETECTED IN NSW WASTEWATERS**

Dear All,

As advised by NSW Health on their website, fragments of COVID-19 have been detected in the wastewaters in certain areas of New South Wales. This may be an indication that the virus is still active within our community, so we ask that you continue to remain alert to maintaining physical distancing and your hand hygiene. Please refer to the following link to see the areas affected: <https://www.nsw.gov.au/covid-19/latest-news-and-updates#sewage>

As the health and wellbeing of our residents, your loved ones and our staff members are our utmost priority, we would like to thank you for taking the time to review the link and to monitor for any symptoms you might have, however mild. Should you feel unwell with a fever (37.5° or higher), a cough, a sore/scratchy throat, have shortness of breath, a runny nose or have loss of smell or taste, please do not visit the Centre and speak to your General Practitioner or call the National Coronavirus hotline on 1800 020 080.

As always, we thank you for your support and we continue to navigate the situation as it relates to COVID-19 in New South Wales. Please get in touch with your Centre Manager if you have any questions.

Kind regards,

A handwritten signature in black ink that reads 'Sjukes'.
